The word composite in the term composite material signifies that two or more materials are combined on a macroscopic scale to form a useful third material. The key is the macroscopic examination of a material wherein the components can be identified by the naked eye.

4 Monoclinic material  
In mechanics of  
composite materials  
we study symmetry in  
other way than in  
crystallography. What  
we call monoclinic  
material is a material  
that have one plane of  
material symmetry in  
point like sense. What I  
mean is the fact that  
Hooke's law in the
