Depending on the size of the moose population and how well it mirrored an ideal condition, the moose population determined the actual carrying capacity for the wolves. Top-down population control is evident in the populations of both the moose and the wolves.

the wolves of isle royale WS Answers Flashcards | Quizlet

SimBio produces software that uses sophisticated interactive simulations to teach biology in an inquiry-driven learning style. We also conduct grant-funded research to understand how to make educational software more effective. Our products allow students to conduct simulated experiments similar to those performed by practicing scientists, in fields of biology where live experiments are impractical or impossible.
